General

Purpose

This document has been created as a guideline for use by the Competitive Local Exchange Carriers (CLEC) to be familiar with the designed functionality of Flow Through and exceptions.

This document is not intended to be used for ordering requirements. CLECs should refer to the CLEC Handbook and the Local Service Ordering Requirements (LSOR) for detailed ordering requirements. These documents can be found at under Tech PUBs and User Guides.

The LSOR provides definitions of Request types (REQ TYPE) and activities used in this document. Only "service order" driven REQ TYPs are depicted in this document.
